

mChanger.sg POS

Your Business Streamlined with POS

mChanger POS is a specialized Point of Sale system designed exclusively for money changers to simplify daily operations, ensure regulatory compliance, and improve customer service. It seamlessly handles foreign currency transactions, real-time rate updates, receipt generation, and MAS reporting—all from a user-friendly.

Why mChanger.sg POS?

The system is designed with a deep understanding of MAS regulations, ensuring that every transaction is traceable, report-ready, and secure. With intuitive tools for sales, rate configuration, reporting, user control, and customer interaction, mChanger POS empowers staff to serve better and respond faster.

Core Features

Transaction Management

Easily record currency exchanges with automatic rate calculations, receipt printing, and audit tracking.

Live Rate Updates

Update buy/sell rates in real time from your web or mobile portal—automatically synced to rate board displays.

MAS & AML Compliance Reports

Auto-generate MAS-compliant reports (STRO, CBNI, AML, etc.) and keep audit trails effortlessly.

Accounts & Ledger

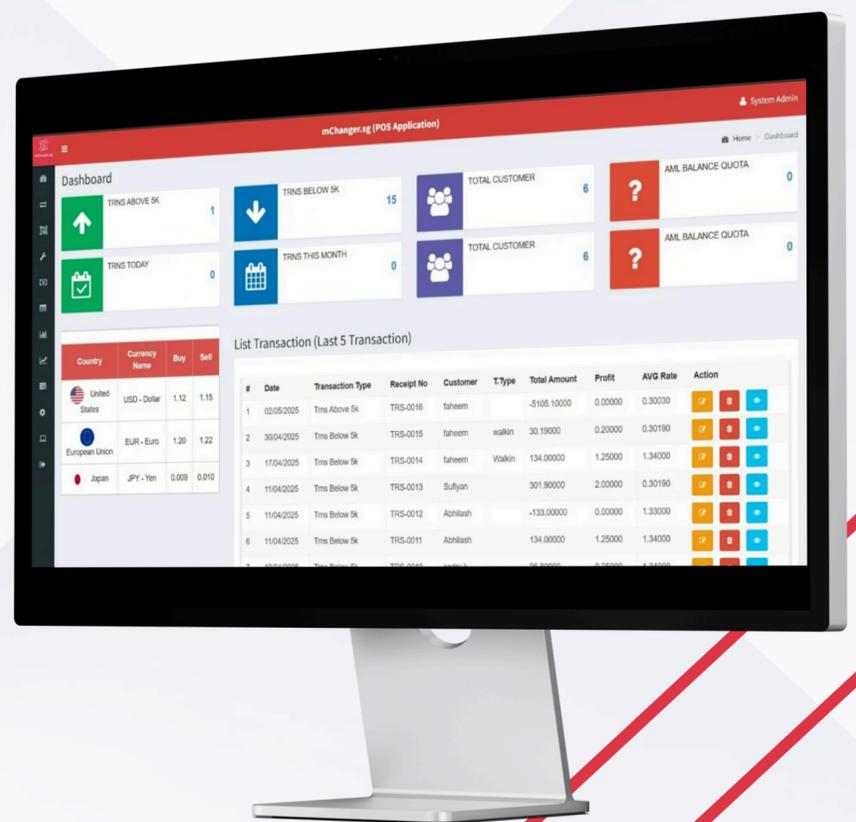

Track income, expenses, capital, and balance sheets—fully integrated with daily transactions.

User Management

Assign role-based access for cashiers, managers, or admins with complete activity logs.

Reports & Analytics

Access transaction history, top currencies sold, daily exchange audits, and profit/loss statements instantly.

Core Modules & What They Do

Dashboard

Get an instant overview of transactions, top currencies, exchange trends, and system alerts — all in one screen.

Transaction

Effortlessly handle buy/sell currency transactions with customer details, KYC, and receipt generation.

Master

Manage currencies, country codes, denominations, user roles, and business-specific master data.

Rates Update

Update buy and sell rates in real time. Sync changes instantly across POS, website, and Rate Board TV App.

Accounts

Manage capital accounts, income/expenses, balance sheets, and generate profit & loss reports.

Reports

Access detailed reports like stock movement, customer ledger, deleted transactions, and audit trails.

Management Reports

Get top-level insights such as top customers, buy/sell group summaries, and high-value transaction reports.

MAS Reports

Generate MAS-compliant reports like STRO, CBNI, AML, Risk Status, and Top Foreign Currency reports — all in one click.

House Keeping

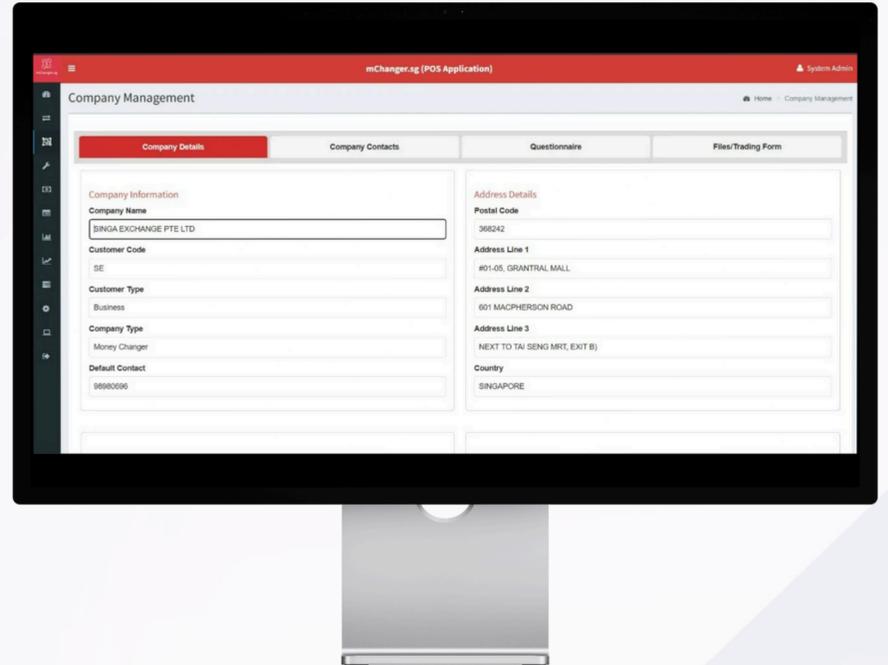

Handle day-end process, system backups, and parameter configurations to ensure smooth operations.

System Settings

Control system-wide configurations such as templates, licensing, and AML password updates.

Users Management

Add and manage users, assign access levels, and monitor activity for better control and security.

Advanced Features & Modules

✓ Customer Screening (AML Search)

Instantly screen customers against global watchlists and maintain searchable KYC records.

✓ Payroll Module

Manage employees, generate payslips, and control access levels for your team.

✓ Housekeeping Tools

Backup your database, manage day-end processes, and keep your system optimized.

✓ PS Reports & Annual Forms

Auto-fill Form 7 & Form 9, and generate top currency sales reports for regulatory needs.

✓ Management Dashboards

View live stats on currency performance, transaction trends, and branch-wise reports.
